

## Digital Assessments

### Kahoot!

Completely free! Kahoot is an interactive assessment tool for students and teachers.

Kahoot allows you to create your own assessments that you will lead the class to complete as a group. Students compete against each other to earn the highest score which adds novelty and motivation to the assessment.

Students will follow along together to complete the assessment. After each question, the program will show which students are in the lead. At the end there will be an overall “winner” declared.

\*\*Students do not need an account to use this program. They simply go to [kahoot.it](https://kahoot.it), enter the code for the game and they are ready!

\*\*To create your own kahoot, go to [www.getkahoot.com](https://www.getkahoot.com)
