QUIZSTAR

“QuizStar is your online resource to create and manage online quizzes. Your students will be able to take quizzes on any computer connected to the Internet.” **(information taken from quizstar site)*

<http://quizstar.4teachers.org/>

Here’s how it works:

Create a Class: Quizstar allows you to create quizzes and assign them to different classes. You decide when the class will take the quiz.

Create a Quiz: You can design multimedia quizzes in different formats; multiple choice, true/false, and short answer and in different languages.

Administer the Quiz: The students who are registered in a particular class can complete the quiz online and during a time span you set.

View Results: Quizzes are graded automatically, and results can be analyzed in multiple formats, including by class, student, and question. Reports can be saved, printed or downloaded in an Excel file.

The screenshot shows the QuizStar website interface. At the top, there are navigation tabs: Home, Profile, Class Manager, Quiz Manager, and Report Manager. Below the tabs, there is a welcome message and instructions for new and returning users. The main content area is divided into three sections:

- Class Manager:** Includes options to create classes (public/private, descriptions, passwords), manage classes (quizzes, rosters, passwords, notices), and delete classes.
- Quiz Manager:** Includes options to manage the quiz repository (create, edit, delete), assign/unassign quizzes, activate quizzes, and edit questions/answers.
- Reports Manager:** Includes options to view quiz reports and adjust the number of attempts allowed.

At the bottom of the page, there is a footer with the 4teachers logo and links for Track Star, RubiStar, NoteStar, Proctor Pro, Move Tools, Privacy Policy, Terms of Use, Contact Us, and ALTEC.
