

Facilities Study RFP Questions – Updated 5/21/18

- Can the District provide CAD drawings of the elementary school layout? The District does not have the CAD drawings to provide.
- The District is requesting respondents to submit 1 to 2 proposed layout design drawings versus just attaching your concept layout drawing as a reference, correct? Yes, we are requesting respondents to submit proposed designs for the office layout and our example was distributed as a reference.
- Are you running a CMMS software platform or Maintenance or a Capital Planning Software Solution? If so, what is the software platform and is it expected that the data from the facility assessment be imported into that software platform? We are using Schooldude, Maintenance Direct, for our CMMS. We do not have a Capital Planning Software Solution at this time. We will not import the data into a software platform.
- There are 2 parts to the RFP; Facility Assessment Study and Engineering/Architecture Design for Elementary School Project. Can a firm reply to just one part of the RFP, such as just the Facility Assessment part; or is this an all-inclusive RFP Scope? We would prefer that a vendor submits both, but we will evaluate each vendor's submission even if they submit only one part of the RFP.
